

AIRCEL

National Private Leased Circuit Service

NPLC Service

Ensuring quality point to point connectivity at all times!

NPLC stands as an acronym for National Private Leased Circuit which essentially means a point to point private leased circuit over the domestic infrastructure of Aircel.

NPLC Circuit offers highly available, reliable and secure connectivity to enterprises with large communication requirements. NPLC Circuits are delivered to customers on Aircel's seamless NLD network having pan-India coverage. Aircel's NPLC network is deployed using state-of-the-art Dense Wavelength Division Multiplexing (DWDM) Technology.

Service Features

High Availability

Aircel offers NPLC Service which guarantees network uptime as high as 99.95% thus ensuring that your business runs at ease.

Greater Reach

NPLC Service is delivered using multiple media options from 70+ PoPs to reach your business establishment.

Lower Latencies

NPLC Service offer lower latencies across domestic PoPs thus resulting in faster access of your applications.

Managed Service (End to End)

The NPLC provided by Aircel is a completely managed service covering technical advice, design, planning, installation and maintenance. This makes the service a complete package with no hassles, allowing the customer to focus on its core activities.

Multiple Speed Options

NPLC Service is offered from 2Mbps and advancing upto n x STM4 to cater to all applications and requirements.

Great Price

Aircel offers the best price in the industry for NPLC Services without compromising on quality.
